this matter, is that South Vietnam  
has held the question of the intended

Defence Secretary Robert Mc Namara  
by a Viet Cong terrorist.

\*\*\*EDITORIAL\*\*\*

We are using today, excerpts of an article which we consider should be of some interest to our readers taken from a publication of the "Awake" magazine. "YOUTHFUL INDIFFERENCE LEADS TO ADULT FAILURE". "When the family automobile is wrecked and the passengers are in the hospital, it is too late to take to heart what your father said about obeying traffic laws. After such a calamity you may regret that you were indifferent to the counsel and warnings you received. But the harm has already been done. The situation is similar when a girl ignores her parents' counsel on proper conduct, only to learn that she is to become mother to an illegitimate baby. With some 250,000 unmarried girls in the United States bearing babies each year, one can be sure that many of them regret that they were indifferent to parental instruction. Although many younger persons may not realize it now, the effects of youthful indifference are certain to be felt later on in life. Such indifference is almost certain to lead to trouble and, in many instances, even death. Therefore, it is vitally important to heed the advice of the inspired Bible proverb: A wise person will listen and take in more instruction, and a man of understanding is the one who acquires skilful direction". Prov. 1:5. To be a successful person in life, one needs to pay attention to instruction when he is young. It is not wise to take an indifferent "know-it-all" attitude. Accomplished musicians, skilled surgeons and outstanding physicists listened and took keen interest in their professions while they were young. This laid the foundation for their success later on in life. In the same way you can show yourself to be wise if you also listen to instruction in your

youth. Only by doing so, will you be prepared to lead successful adult lives. Your home is a training center to prepare you for adult life. Here, habits and behaviour patterns are formed that will either be beneficial or detrimental to you when you grow up. They will determine whether you will develop into a mature, respectable man or woman, or will remain childish and immature in your ways. "Am I listening and taking instruction?" Consider the matter of neatness and cleanliness. Most parents try to teach their children to pick up after themselves, to make their bed, and to keep their clothes clean. But all too often it goes in one ear and out the other. Indifferently turning a deaf ear to instruction can lead to difficulty. So listen to instructions while you are young and thus lay the foundation for a successful adult life!

He said: "Too many of us are allowing our senses to get bogged down in the bitterness and misery of the present situation....too many of us are thinking only of what we can do to obstruct someone else's plans.

(Continued from page 3).

The United Force was the third political party in successive nights to explain plans and policies in a series of pre-nomination day broadcasts. THINGS TO KNOW.

GOVERNMENT REGULATION OF 1865.

In 1865, the statutory structure of Government for the West Indian Colonies underwent a drastic change in that provision was made for the institution of Government Councils for Surinam & Curacao. These Government Councils consisted of the Governor as President and three members appointed by the Crown. In addition, a Colonial Council of 13 members appointed by the Crown. Theoretically, one Aruban could have a seat on the Council, but in practice the appointment went to an Aruban residing in Curacao because of transportation difficulties of those days. Hence the Council could not be considered a representative body since, although Aruba had one member, this gentleman was never up-to-date on Aruban problems. The Windward Islands were Governed from Curacao through Crown appointed functionaries; some local matters were decided by elected Councils under the Presidency of the Lt. Governor.

LIEUTENANT GOVERNOR.

In Aruba, after 1848, the position of Lt. Governor was instituted. In practice the transition from Commandeur to Lt. Governor involved a minimum of change and the new Administrator continued to be the patriarchal figure that the Commander before him had been.

CONDITIONS IN ARUBA THROUGHOUT THE 19TH. CENTURY.

Aruba was dependent on Curacao for decision making and tax monies to an inordinate degree. Seemingly, Curacao did not care whether the daily affairs of Government in Aruba were executed or not. Permission had to be obtained for the most routine matters, for example, Fls. 5. 90 for repairing the munitions dump.

(To be continued next week).

SAFEGUARD FOR YOURSELF AND OTHERS!

The only safeguard, authorities agree, is to keep all plants away from very small children who may nibble on them, or put in their mouths any plant or berry not commonly used as food. Adults, of course, shouldn't make "medicinal" concoctions from plants or chew on plant stems. If someone does ingest a dangerous plant, call a physician immediately for his advice. Its not always advisable to induce vomiting, for some plants contain corrosive juices that could severely damage tissue of the digestive tract during vomiting.

San Nicholas, Aruba.

Oct. 1st. 1964.

Dear Mr. Editor: A few would be so-called journalists have been trying to poison the minds of certain section of the community against your paper, The Universal, but we, who belong to that same community, know better. There is one particular individual who is otherwise regularly employed, going around ruthlessly trying to criticise your paper because of fear of its popularity. We know, that with your background, experience and knowledge, that this poor sufferer from inferiority complex and depraved minded individual is only making himself more ridiculous in our eyes. Many of us intend to show him and teach him a lesson that we do not pay attention to meaningless noises similar to those made by empty drums. We shall continue to support The Universal, despite the boycotting attempts being made by these nonentities and their gang.

FIRE AT JAN FLEMING, SANTA CRUZ.

At about 12.24 P.M. on Thursday Oct. 8th. there was a fire at Jan Fleming # 26, Santa Cruz. The fire was extinguished at about 12.44 P.M. We understand that two thirds of the house was badly damaged. Only a small wooden table was saved. In connection with the fire, a young man was detained for questioning and locked up. It is alleged that he is suspected of having some knowledge of the cause of the fire because of a family argument in which he was involved on the previous day Wednesday October 7th. We understand that Cornelio Frederico Thielman of Bonaire and his family of 10 occupied the house. The Bonaire Club has undertaken the task of soliciting aid for the fire victims and we urge everyone to give generously to the cause.

SUGAR BOY NANDO IS STILL UNDEFEATED MIDDLEWEIGHT CHAMPION OF THE NETHERLANDS ANTILLES. \*\*\*

By: Our Ringside Reporter

The 15 round bout of 3 minutes fight and 1 minute rest for the middleweight title of the Netherlands Antilles, which can be called the fight in years at Aruba, presented by matchmaker Johan Steffania, under the auspices of the Aruba Boxing Commission took place on Friday night last at the Wilhelmina Stadium, between Sugar Boy Nando of Aruba, the champion, and Jack Johnson of Curacao, the challenger.

There was a very large crowd as never had been seen before in years including Jack Johnson's fans from Curacao who came over by special chartered planes from Curacao to cheer their contender. The majority of the crowd, however, favoured their idol and hero Sugar Boy nando and supported him from the beginning to the end of the fight. It was a beautiful night as the weather was very favourable. Nando, the Antillean champion, idol and hero worldwide, with the fighting spirit and known as an excellent and clean boxer retained his title. His boxing standard in his class is very high and unequalled. It can also be said that Jack Johnson also has a very high standard of boxing, and has a bright future as a boxer. The Antillean Champion, idol and hero, Sugar Boy Nando was right when he had this to say before the fight: "This is the chance for Johnson to prove he can fight, however, he will have to wait till I retire from boxing to become Antillean Champion". During the fight, both boxers showed signs of receiving cuts on their faces. However, these incidents did not stop them from maintaining their upright fighting positions. When the decision was given, all of

Nando's supporters were overjoyed and loudly cheered him on his glorious victory for being the undefeated Netherlands Antillean Champion. Sugar Boy Nando deserves to be called Champion, hero or idol. He is outstanding and his name should and must go down in Aruba's and Antillean's history, for his achievements. The big question at the moment is, who will try next? However, Nando will not worry about that. He will always be there as Champion, Idol and Hero until he decides to retire and give someone else a break. The referee was well known and experienced Mr. Jim Lambert. The

judges were Messrs: Herman Figueira with quite a number of years experience in Boxing and Physical Culture, and the other Stanley Smith. The doctor at the ringside for any eventuality was Dr. H. Dennert. The scoring cards of the referee and the judges are as follows:

|                 | Nando. | Jack Johnson. | Even. |
|-----------------|--------|---------------|-------|
| Referee Lambert | 5      | 5             | 5     |
| Judge Smith.    | 7      | 4             | 4     |
| Judge Figueira. | 6      | 5             | 4.    |

**ABORTION.**

The expulsion of the fertilized ovum or embryo from the womb during the first 3 months of pregnancy is called abortion. Termination of pregnancy between the 3rd. & 6th. months is called miscarriage and expulsion between the 6th. & 9th. months is called premature delivery, whether the infant is born alive or not. Abortion may be accidental, induced, spontaneous or therapeutic. Falling or injuring the abdomen are of course accidental. Using chemical or physical means to induce abortion is dangerous and most often termination of the unwanted condition results. (Continued on page 11).

Continued from page 10.

Spontaneous abortion is due to some internal abnormality rather than to outside accident or interference. Therapeutic or surgical termination of pregnancy by a doctor can be done for the purpose of saving a woman's health and life. But this must be done under the strictest care of the physician and followed by a careful nursing and rest to avoid any ill effects. Unhappily, some women are victimized by those who perform surgical abortions illegally, and often unnecessarily. This may cause both physical and mental danger to the woman, and sometimes proves fatal. During the first 4 months and the last month of pregnancy, it is wise for the woman to take long and strenuous trips, and of course she should not indulge in sports activities which are too taxing at any time during her pregnancy. "Threatened abortion" should be suspected when a pregnant woman starts spotting blood from the genitals, accompanied by pains in the lowest part of the abdomen or in the small of the back, during the early months. If the woman goes to bed immediately, applies an icebag to the lower part of the abdomen, and calls a doctor, an abortion or miscarriage may often be prevented and a full normal delivery expected.
